EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Mark Nusbaum on February 03, 2005.

The application has been amended as follows:

In the specification, paragraph 0045, line 3, the number "126" has been deleted and the number -- 122 -- has been inserted.

The following is an examiner's statement of reasons for allowance: The prior art teaches a vehicle body, a motor and wheel mounted on an end portion of a wheel shaft; however, the prior art fails to teach the "wheel shaft includes a polygon shaped wheel driving element that is countersunk into an inner portion of said wheel having a complimentary polygon shaped recess", and "wherein rotation of said wheel shaft by said motor causes rotation of said wheel driving element, which in turn causes rotation of said wheel driving element, which in turn causes rotation of said wheel as a result of said wheel driving element being countersunk into an inner portion of said wheel".

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
